

# INTRODUCING ... **A-PLUS SERIES™ TOOLING** EXTENDED FORM SIZE FOR TRUMPF STYLE TOOLING

Wilson Tool has extended the maximum size of forms possible in Trumf-style tooling with the new A-Plus Series™ of forming tools. This new range of special tools extends the current boundaries of form size by 25mm or more, allowing Trumf and Pullmax machine users to produce louvers, lance & forms and card guides which were previously impossible on their machines.

**The A-Plus Series™ Louver Tool** has extended the possible size from 76mm to 101.6mm, and is designed with built-in stripping in the lower unit for trouble free sheet travel and simple programming.

**The A-Plus Series™ Lance & Form Tool** has extended the possible size from 63mm to 88.9mm, and can be used in many applications such as for air flow, decoration, location markers, sheer tabs, wire harnesses and clip attachments.

**The A-Plus Series™ Card Guide Tool** has extended the possible size from 71mm to 86.4mm, and provides vast savings when compared to expensive secondary operations such as plastic inserts.

A-Plus Series™ tools are available for most Trumf Group I machines and Pullmax machines. A modified cartridge (also available from Wilson Tool) is required with this range of tools.

For more information on the A-Plus Series™ range, please contact your local Wilson Tool representative or our Sales Desk on 0800 373748 (freephone) 1-800 709009 (freephone Eire) or alternatively email [sales@wilsontool.eu.com](mailto:sales@wilsontool.eu.com).
