

BRUSHED DIE ADAPTER FOR TRUMPF STYLE DIES

Eliminate sheet marking...

...Effortlessly

♦ **Eliminate sheet marking –**

– with the new size I – II Brushed Die Adapter from Wilson Tool. The adapters brushes allow the sheet to slide into position with no metal to metal contact.

♦ **Reduce noise**

Because there is no contact between the material and the die right up to the point of punching, virtually the only noise from your machine will be the punching itself.
