## INTRODUCING... THE NEW WILSON XTRA CATALOGUE

Now, more than ever, is the time to add value to your sheet metal processes with lean solutions from Wilson Xtra®.

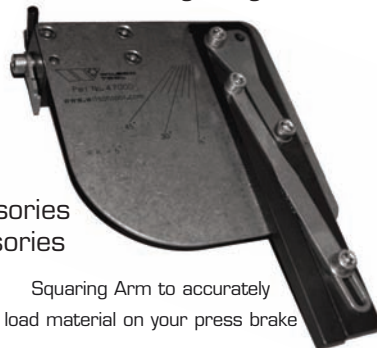

We offer a variety of innovative solutions for your lean workshop to help you increase productivity and reduce waste.

The Wilson Xtra® selection of machines and accessories enhance your productivity and keep your tools running smoother, longer.

### **Xtra marks the spot for lean workshop accessories!**

The new Wilson Xtra® catalogue contains the following range of accessories:

- Hand tools
- Lubricants and Coolants
- Tool Handling and Storage
- Tool Assembly and Alignment
- Punch Press Tooling/Machine accessories
- Press Brake Tooling/Machine accessories
- Laser system accessories

Squaring Arm to accurately load material on your press brake

Non-Slip Panel Grips to safely lift and carry sheet materials

Rubberised Abrasive Wheel to remove galling from punches

Holma® Dirt and strain viewer and cleaning set to check your laser lenses for dirt and defects

### **Tricks of the Trade**

**Q:** Do you have any suggestions for reducing sheet marking on my Press Brake?

**A:** Sheet Marking is a much larger issue for today's Sheet Metal Worker. It is now not only materials such as stainless steel and polished aluminium that need to be mark free; companies are looking for a much better surface finish on all types of material. In addition to improved part quality, reduced sheet marking can also prevent the need for expensive secondary finishing operations.

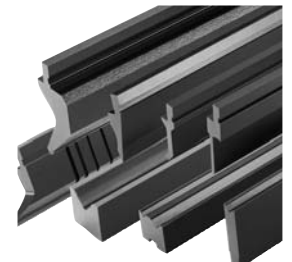

A number of factors affect sheet marking, including material type and thickness and how your tooling is stored and maintained. Wilson Tool Press Brake can help with a number of solutions:

1. Tool Care - Extreme Storage Solutions with the Wilson Tool cabinets
2. Nitrex Coating
3. Increased Shoulder Rad
4. V-Series Tooling
5. Urethane and Polycarbonate dies
6. Urethane roll
7. Lubrication

Please contact Wilson Tool to request a copy of the "Reduce Sheet Marking" flyer or for more information on reducing sheet marking.

V-Series Tooling

Nitrex Coating
