

WILSON TOOL INTRODUCES...

## PRE-CUT PULLMAX STRIPPERS

WANT TO REDUCE THE SET-UP TIME BETWEEN JOBS?  
THEN TRY OUR PRE-CUT STRIPPERS.

The pre-cut strippers are precisely cut to match the profile of the punch, with the ability to assemble the stripper to the punch prior to loading the machine.

The pre-cut stripper has the advantage of being easier to fit to the punch assemblies when compared to a stripper which is punched.

This essentially reduces set-up time between jobs and also eliminates the need for the cumbersome manual method of punching the strippers whilst in the machine.

Suitable for all Pullmax urethane stripper machines.

**SIMPLY QUOTE YOUR PUNCH SHAPE AND  
DIMENSIONS AND WE WILL CUT THE STRIPPER  
APERTURE FOR YOU.**
